Talent Operations & Automation Leader | Technical Sourcing | AI Workflows | Internal Systems Development | Process Optimization

Professional Summary

Talent Operations, Automation, and Technical Sourcing professional with experience spanning talent intelligence, recruiting operations, workflow automation, internal systems development, AI-enabled business processes, and engineering hiring. Recognized for building scalable operational solutions, leading global talent initiatives, improving hiring outcomes, and partnering with engineering leadership across complex organizations. Known for identifying business problems, designing practical systems, and translating operational challenges into measurable results.

Core Competencies

Talent Operations • Recruiting Operations • Talent Intelligence • Technical Sourcing • Program Leadership • Process Optimization • Workflow Automation • AI Workflows • Google Apps Script Development • Business Systems Analysis • Stakeholder Management • Analytics & Reporting • Knowledge Management • CRM & ATS Systems • Technical Interviewing

Professional Experience

Uber | Technical Sourcer

Aug 2024–Present | Previously Aug 2021–Aug 2023 | Dallas, TX

- Lead Frontend and Fullstack sourcing initiatives across LATAM engineering organizations while supporting Backend, Mobile, and Engineering Management hiring.
- Partner with 6 Engineering Managers and engineering leadership to develop hiring strategies, candidate calibration frameworks, market intelligence, and pipeline planning.
- Achieved 56 engineering hires, including 2 L6 Engineering Manager hires, in one of Uber's most competitive engineering markets.
- Conduct technical candidate assessments and provide hiring and leveling recommendations to engineering leadership.
- Designed and deployed a Candidate Management Platform integrating candidate intake, pipeline tracking, analytics dashboards, start tracking, calendar synchronization, and reporting.

- Built a recruiter allocation and round-robin application supporting 25+ users, 28 requisitions, 9 role categories, and 800+ candidate assignments.
- Implemented automated recruiter availability and out-of-office workflows to improve assignment accuracy and operational efficiency.
- Led the LATAM DXFI(Decline, Ex-Uber, Former Intern) program initiative from pilot through global launch, creating operational playbooks, engagement workflows, and internal applications.
- Created centralized onboarding and knowledge-management platforms to improve team accessibility, documentation, and manager transitions.
- Developed Google Apps Script applications, Beamery automations, AI-assisted workflows, Gemini Gems, and NotebookLM-based solutions supporting recruiting operations.
- Built Python-based GitHub API sourcing tools to identify engineering talent through repository activity and contributor metrics.
- Selected as a mentor and regularly consulted by managers, directors, and senior leaders on systems, dashboards, automation, and process improvement initiatives.

Military Technical Recruiting (MTR) | Veteran Placement Specialist

Jun 2024–Aug 2024

- Managed full-cycle recruiting supporting transitioning service members and veterans.
- Partnered directly with employers to understand workforce requirements and technical hiring needs.
- Developed Google Apps Script outreach automations and candidate engagement workflows.
- Built talent databases organized by military specialties, certifications, and transferable skills.
- Supported hiring across engineering, maintenance, industrial, field service, electrical, and data center roles.

Ceatus Media Group | Full Stack Developer (Contract)

Aug 2023–Dec 2023

- Developed web applications using Ruby on Rails, PostgreSQL, JavaScript, HTML, CSS, and jQuery while supporting feature development and business requirements.

ABF Freight | City Driver / Dock Operations

Mar 2020-Jul 2021

- Coordinated freight operations, hazmat compliance, cargo security, and load distribution.
- Led loading operations supporting a high-volume logistics hub while ensuring safety and operational standards.

United States Army | Squad Leader

May 2013–Mar 2020

- Led, mentored, and developed a squad of Soldiers while ensuring mission readiness, accountability, and operational excellence.
- Recognized for leadership, problem solving, and developing junior leaders.

Selected Projects & Leadership Highlights

- Candidate Management Portal – Built internal recruiting operations platform supporting intake, analytics, reporting, candidate tracking, and calendar automation.
- Recruiter Allocation Platform – Designed operational workflow platform used by recruiters, sourcers, and managers to distribute candidates fairly and track activity.
- DXFI Global Launch – Led operational rollout and documentation for Uber’s Declined Offer, xUber, and Former Intern initiative.
- LATAM Knowledge Hub – Created centralized resource platform for onboarding, documentation, reporting, and team resources.
- GitHub Talent Discovery Platform – Built Python application leveraging GitHub APIs to identify engineering talent.

Technology

JavaScript, TypeScript, React, Angular, Vue.js, Python, Django, Flask, Ruby, Ruby on Rails, Java, Go, C/C++, SQL, PostgreSQL, MySQL, Google Apps Script, Beamery, Workday, iCims, Oracle, LinkedIn Recruiter, HackerRank, Gemini, NotebookLM

Education & Certifications

Frontend Development Certificate – WGU

Full Stack Web Development Certificate - LEARN Academy Bootcamp

US Army Veteran
